

Business Redevelopment

My group mates were Carlos Felip And Ulises Ortga.

We each worked on a part of the project. Carlos worked on the hero image and the about us page, He was responsible for that but he also worked a lot on making sure it was all responsive. I liked working with him he was communicating and doing all his work the right way.

Ulises started with the project he added the needed pages and created different branches

He worked on the hardest part which was the menu. He also did work on the navbar and footer. he was a good teammate. i was happy to work with him .'

We are making use of elements such as Navbar, Hero Images, Menus with border, added an image gallery, location and footer. That helped us know how much we have to work on .

I worked on the Gallery page and the map page. This website was really easy for me. I didn't have any problems making it. I liked working on this project knowing that me and my teammates designed it .
